

What is cTrader in 2025

Premium FX/CFD trading
platform trusted by traders,
flexible by design

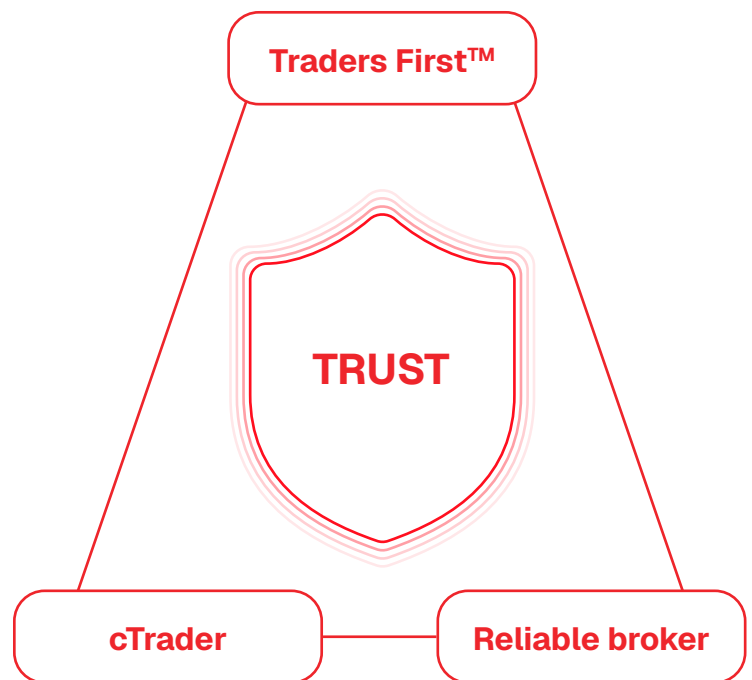

cTRADER

Traders First™

Traders know that **only trusted brokers** offer cTrader, the hallmark of reliability in FX/CFD trading. More than just a platform featuring transparency, cTrader sets reputable brokers apart from scammers. Here is why:

- cTrader onboards only regulated and ethical brokers, safeguarding traders' funds.
- Server plugins that manipulate trades and deviate from fair market execution are unavailable.
- Price injection and stop-loss hunting are strictly prohibited in cTrader.
- cTrader promotes honest practices to shield traders from requotes and rejected trades.
- Brokers cannot simply delete a trading account and claim it has never existed.
- cTrader has never been banned from app stores for violations.
- cTrader provides detailed trade receipts, making brokers accountable to their clients.
- cTrader equips traders with advanced protection tools.
- As a hosted solution with regulator-accessible servers, cTrader ensures compliance and legal protection.
- cTrader Proxy Cloud adds an extra security layer, blocking unauthorised and malicious connections.

cTrader is a win-win solution that fulfils the trader's need for fair trading and equips forward-thinking brokers to excel in their long-term strategy.

Become a trusted broker
by putting **Traders First™**
and offering cTrader
to your clients!

Open Trading Platform™

Since its inception, cTrader has been designed as a **flexible trading platform**, delivering bespoke solutions to FX/CFD brokers, tailored to their unique business needs.

Streamlined integrations

cTrader is already integrated with over 100 popular FX/CFD solutions such as CRMs, liquidity providers, analytics and reporting systems, and the list continues to grow.

Extensible UI and functionality

cTrader offers vast options for integrating third-party services and personalising the UI through plugins. The platform flexibility caters to all brokers and extends across devices.

Custom trading solutions

The open interface allows all users to create custom apps connected to the cTrader backend, including trading terminals, AI-based assistants, technical analysis tools and more.

Community-driven development

The cTrader team listens closely to community feedback, incorporating highly requested features into the development roadmap. Contact us if you want a custom solution!

Leverage the flexibility of the Open Trading Platform™ and make cTrader truly yours to achieve your business goals!

Ecosystem

With brokers at its core, cTrader delivers a wealth of cutting-edge products to traders and equips partners with powerful IB tools. The cTrader ecosystem has evolved into an expansive and balanced product offering, all designed to ensure the **growth of our brokerage clients**.

Brokers

- cTrader Admin
- cServer
- Infrastructure
- Integrations
- Plugins
- Widgets
- Open API
- Other APIs
- Branded cTrader apps

Partners (IBs)

- Invite
- cBots with cloud execution
- Plugins
- Store
- Widgets
- Signal links
- Sharing deals
- Shared Access
- Deeplinks
- Apps for iOS, Android, Windows, Mac and Web
- Open API

Traders

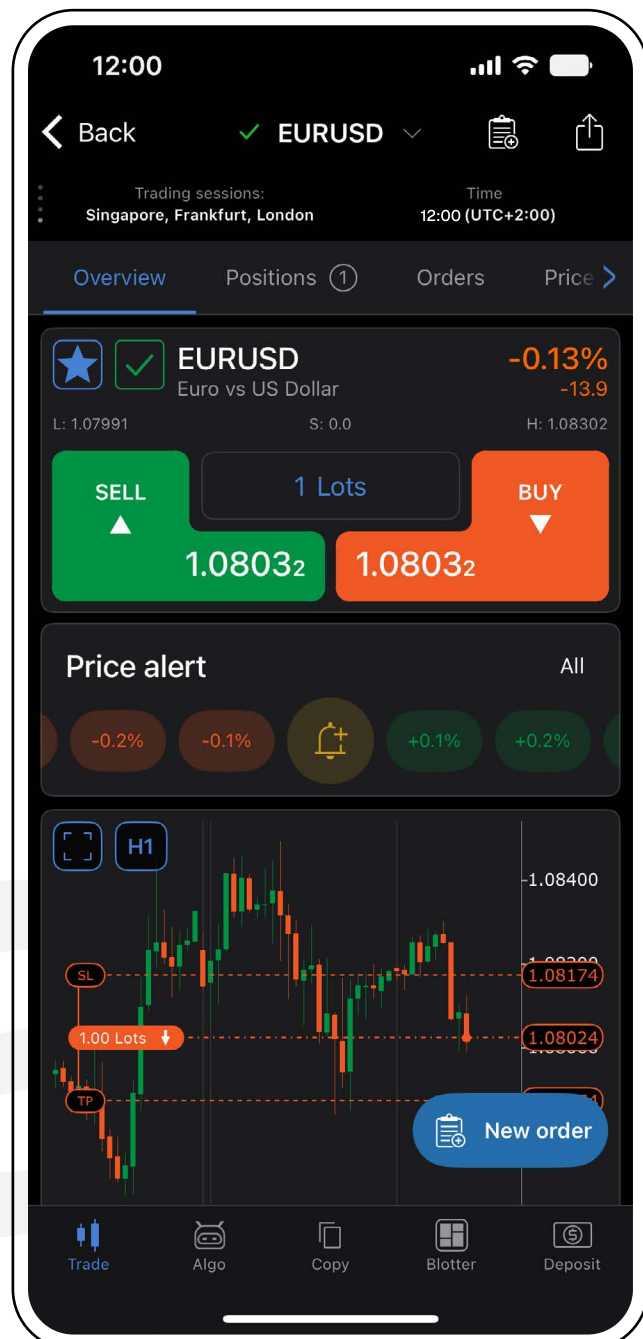

- Trading
- Charting
- Copy
- cBots with cloud execution
- Plugins
- Indicators
- Store
- Apps for iOS, Android, Windows, Mac and Web
- Open API

Trading

Both beginner and seasoned traders love cTrader for its **precise trading tools** that enable efficient trade execution.

- A variety of order types, including market, limit, stop and stop-limit orders
- Ultra-fast order execution due to sub-millisecond processing
- Quick Trade buttons for instant and intuitive trading on the chart
- Advanced stop loss and take profit, server-side and trailing protections
- Depth of market (Level 2) and market sentiment
- Detailed deal history and transparent transaction record

Charting

cTrader offers traders the most **comprehensive charting solution** that empowers accurate market analysis and informed trading decisions.

- 6 chart types (candlesticks, bars, line, dots, area and HLC)
- 5 period types (standard, tick, Renko, range and Heikin Ashi)
- 86 standard indicators and thousands of custom indicators
- Versatile technical analysis and drawing tools
- Intuitive risk-reward tool for calculating trade volume in all apps
- Customisable workspaces, chart templates and multi-chart mode

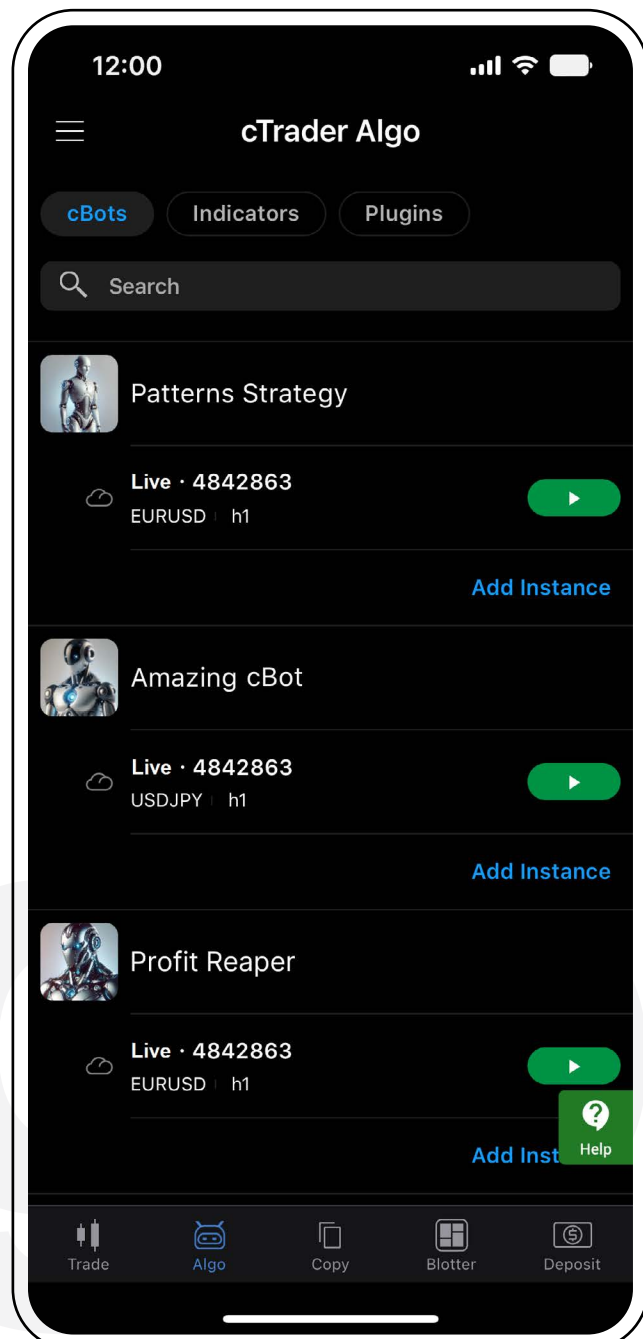

Watch [video](#)

Algo trading

cTrader Algo brings game-changing capabilities that make it incredibly easy for every trader to dive into algo trading.

- Free algo hosting with cross-device access
- 24/7 cloud execution for cBots without a VPS
- Algo files open and launch from mobile apps
- Easy automation of any strategy in the built-in code editor
- Accurate backtesting of trading robots based on historical data
- Optimisation for the best parameter configuration

Watch [video](#)

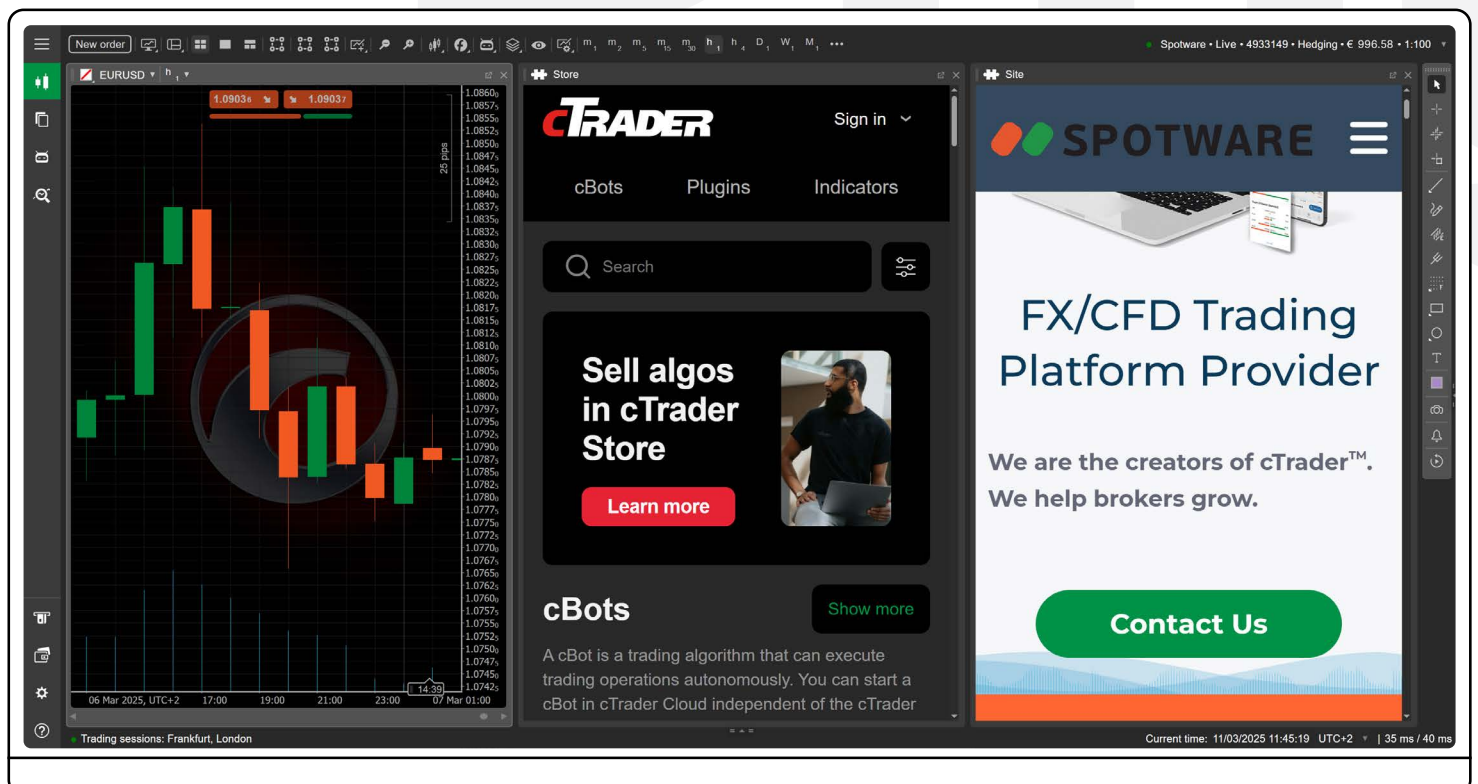

Plugins

Plugins provide access to a wide range of **third-party services** within cTrader apps, enabling smooth integration and dynamic UI customisation.

Desktop plugins

Native plugins for cTrader Windows and Mac allow users to add custom functionalities to various interface areas:

- Trade Watch
- Active Symbol Panel
- Toolbar buttons
- Chart frames
- Windows
- And more

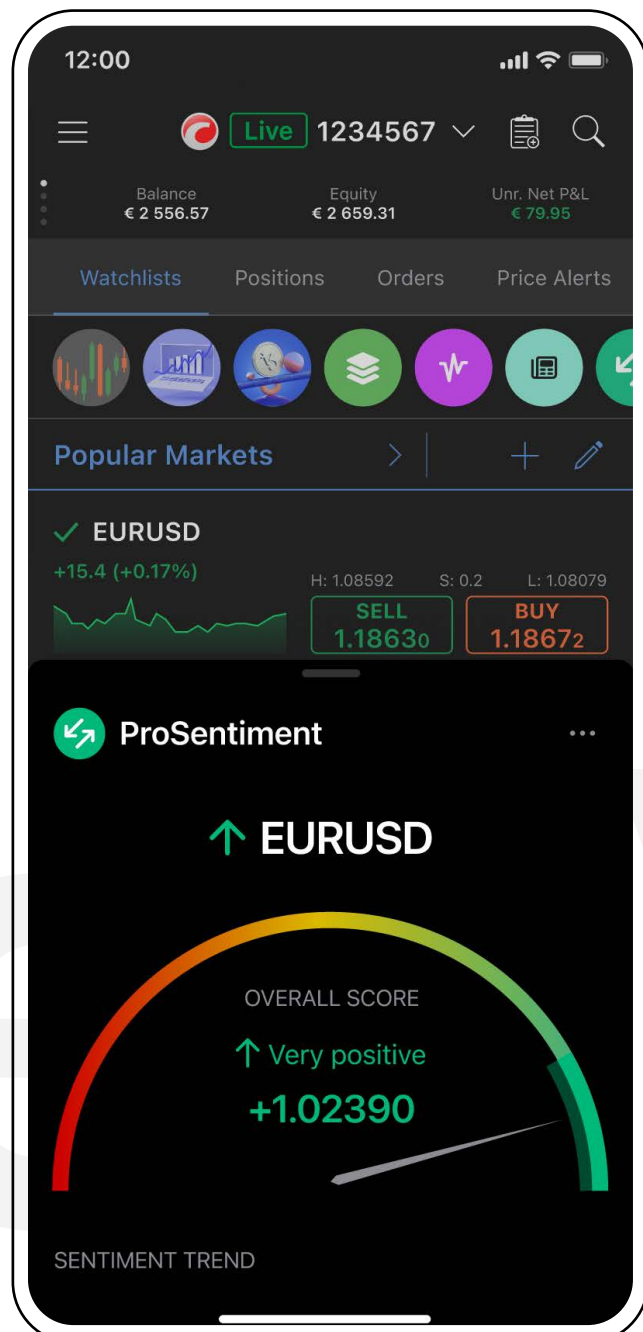

WebView plugins

WebView plugins extend cTrader Mobile and other apps, supporting the integration of any versatile service a user might need:

- AI assistants
- Trade calculators
- Trade dashboards
- Pattern trainers
- Hashtag-based newsfeed
- Technical analysis widgets
- Forex cross rates
- Symbol notes
- And more

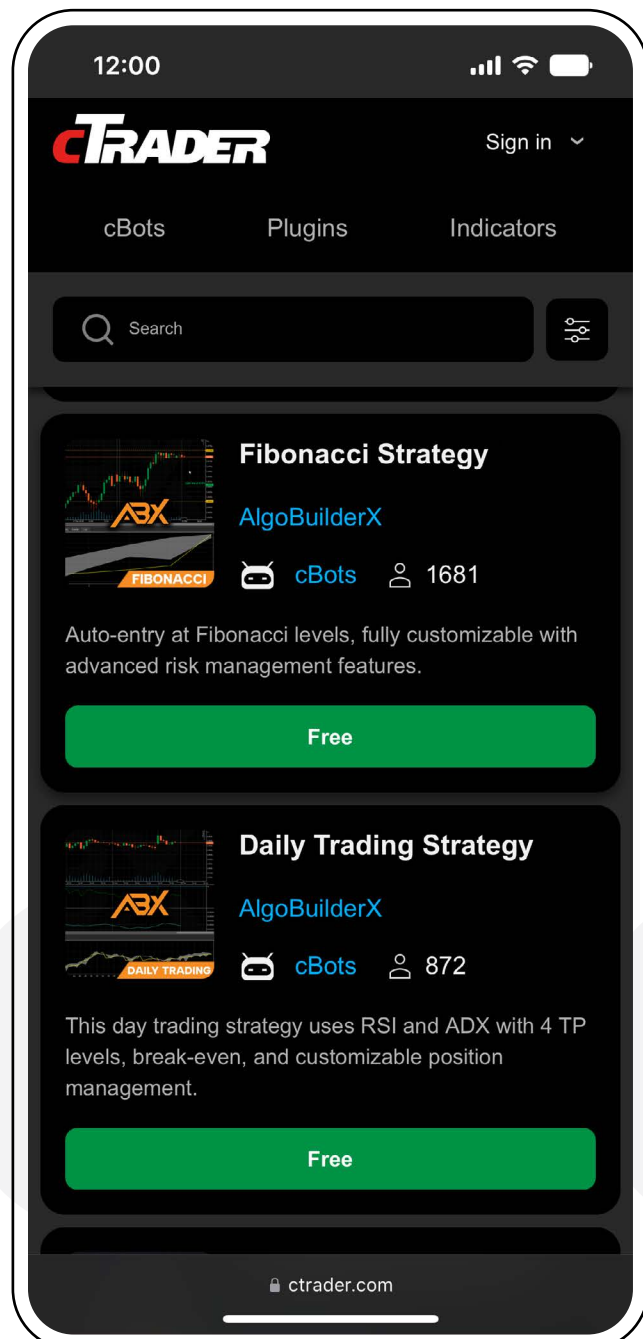

Store

By offering a diverse supply of algo-trading tools, **cTrader Store** empowers brokers to grow their trading volume and maintain strong engagement with traders.

Discover [cTrader Store](#)

- cBots, plugins, indicators and Open API apps as appealing products
- Cloud compatibility for instant cBot start and easy uploads
- 8M+ cTrader users globally are potential buyers
- Rich monetisation opportunities for algo creators
- Secure transactions for all parties, unlike in random retail channels
- Built-in licensing and source code protection to safeguard intellectual property

Copy trading

Investors and strategy providers connect in **cTrader Copy**, an integrated social trading platform that unlocks beginner-friendly and continuous trading for brokers.

- Hundreds of successful cross-broker strategies
- Transparent performance stats for informed strategy choice
- Zero-experience and commitment-free investment
- Equity-to-equity copying and equity stop-loss protection
- Extra income from strategy fees for providers
- Built-in strategy promotion tools to boost participation

Partner tools

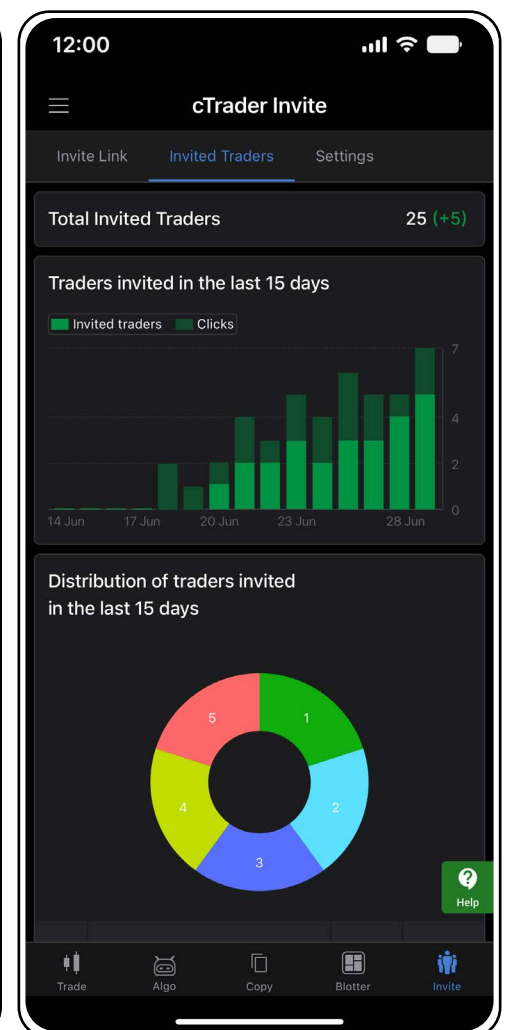

cTrader Invite is an all-in-one toolkit for IBs, designed to help partners maximise referral conversions and drive trader engagement, ultimately growing the broker's client base.

Any cTrader link works as an invite link, attributing users and engaging them in trading.

Partners get a profile page to share contacts with traders and promote their cTrader products.

Partners can track real-time statistics of their invited traders directly in the app

New traders are redirected to the broker's site, or cTrader Invite integrates seamlessly with the CRM for all registrations and attributions.

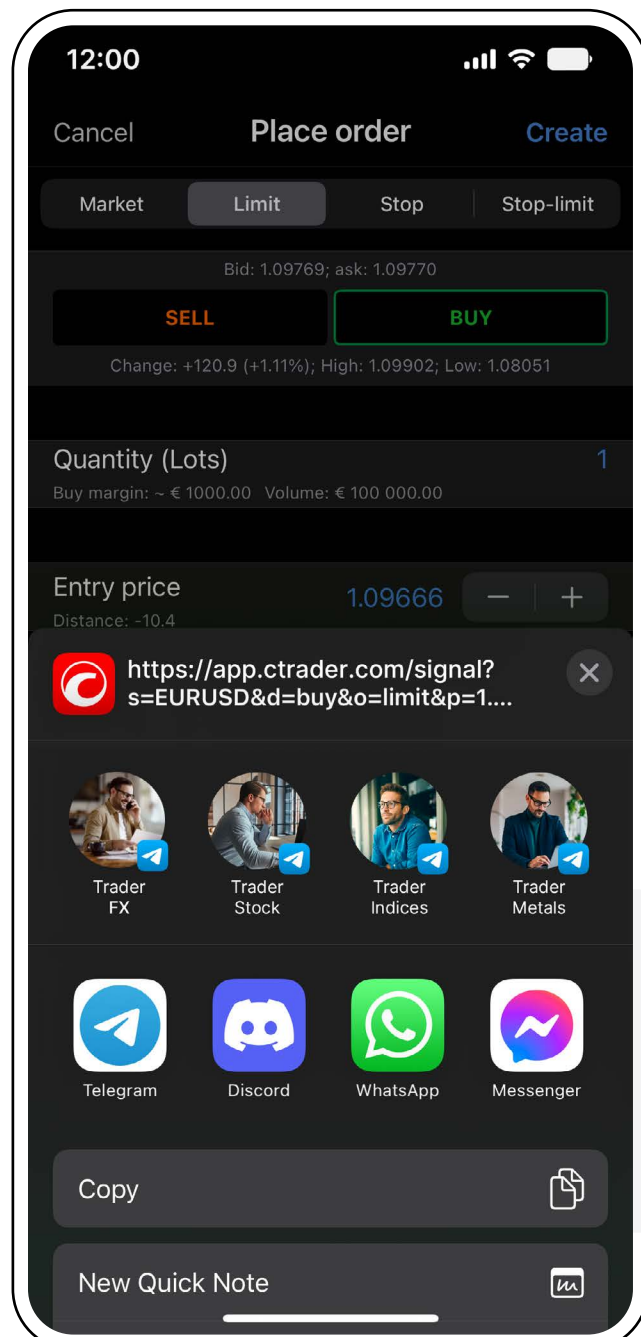

Watch [video](#)

Other partner tools cater to the specific needs of IBs who act as signal providers, educators, and money managers.

- **Signal links** for actionable trading opportunities
- **Sharing deals** for a strong online reputation
- **Shared Access** for secure remote trading
- **Deeplinks** for targeted calls to action (open an account, deposit, place an order)

Extensibility

As a truly **Open Trading Platform™**, cTrader offers unparalleled extensibility in the FX/CFD industry.

Plugins

Plugins are perfect for integrating any third-party services and tailoring the cTrader UI across apps.

Widgets

Embed the cTrader trading terminal and copy service directly into your client area to keep traders engaged, all in one place.

Discover [cTrader Widgets](#)

Open API

Develop unique apps connected to the cTrader backend:

- Custom trading apps
- Technical analysis tools
- AI-based assistants
- Apps for wearables
- Signal and alert systems
- And more

Other APIs

- [WebServices API](#) is a powerful solution for integrating cTrader with any backend operation system like a CRM.
- [Reporting API](#) enables brokers to build any report they need for backend operations.
- [Manager's API](#) is an efficient tool for creating custom communication systems with the cTrader backend.
- [FIX API](#) is an industry-standard protocol available for all cTrader users for free.

Platform management

cTrader Admin is a versatile and convenient platform management system that serves as a cockpit for brokers.

- Unlimited users and accounts for scalability
- Effective management of symbols and liquidity feeds
- Easy transfer of settings between servers
- Flexible control over managers' access rights
- Advanced risk management features and streamlined reporting
- A variety of marketing options to engage with clients

Platform

Infrastructure

cServer is the heart of cTrader, working behind the scenes to execute control over trading operations.

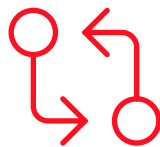

- Sub-millisecond processing and a 100% uptime record
- Unmatched scalability with infinite server entities (accounts, symbols, groups)
- Zero maintenance costs for brokers
- Customisable configuration for commissions, margin calculation strategies, swaps, dividends and risk statuses

cTrader is a cloud solution hosted by Spotware on **world-class infrastructure** that ensures the uninterrupted operation of your trading platform.

EQUINIX

Located in the Equinix London and New York data centres

Cross-connects with major liquidity providers

AWS Global Accelerator to elevate platform availability, performance and security

“

“cTrader has proven to be an invaluable asset for our clients, providing them with a powerful and intuitive platform to navigate the financial markets. We’ve been consistently impressed by the responsiveness and dedication of the Spotware team, who have worked closely with us to ensure seamless integration and a superior trading experience for our clients.”

Aggelos Armenatzoglou, Head of Dealing,
Deriv

“Tradeview Markets cTrader Suite was delivered in 6 days. It was an effortless process for us to set up and configure. Over the past 12 months, we have been impressed with the level of support and speed of troubleshooting assistance we have received, even while operating in a totally different time zone. This allows us to help our clients faster and reflects great on us.”

”

Michael Turck, Global Head of Liquidity and Sales,
Tradeview Markets
